Technical Profile

- TypeScript
- Go
- Python
- Apache Airflow
- Google Cloud Platform
- IaC/Terraform
- SQL databases
- Google BigQuery
- Vanilla Javascript/HTML/CSS
- React/NextJS
- Express/NestJS
- GraphQL

Competencies

Software Architecture

Data Intensive Systems

Growth Engineering

Platform Engineering

High Velocity Startups

As a Senior Software Engineer, I have successfully led and delivered several full-stack and platform engineering software projects in a fast-paced startup environment. I have a strong background in designing and implementing scalable, robust, and user-friendly solutions for complex problems. I value teamwork and collaboration as essential skills for effective software development.

Work History

2022-12 -
Current

Software Engineer IV

Yardzen, Sausalito, CA

- Designed and built full-stack applications and infrastructure to power managed marketplace for outdoor lifestyle renovation.
- Trained and mentored junior developers and engineers, teaching skills in the disciplines of application development, project management, and platform engineering.
- Took ownership of several large business defining projects and initiatives, delivering each on time and with a high bar for quality.
- Collaborated cross-functionally with management, internal and development partners regarding software application design status and project progress.
- Led a re-platforming effort with the goal of increasing developer productivity and building a foundation that accommodates rapid iteration of Yardzen's product offerings.
